

Heal Your Pet with Laser Therapy

Drug free. Surgery free. Relief for Your Pet.

What is Laser Therapy?

A surgery-free, drug-free, noninvasive treatment to:

- Reduce Pain
- Reduce Inflammation
- Speed Healing

Class IV Deep Tissue Laser Therapy uses a beam of laser light to deeply penetrate tissue without damaging it. Laser energy induces a biological response in the cells called "photo-bio-modulation", which leads to reduced pain, reduced inflammation, and increased healing speed.

What are the Costs?

Treatment protocols are unique to each patient and condition. Therefore, treatments will vary in time, complexity, and cost.

Laser therapy can be used to enhance other treatment plans recommended by your veterinarian.

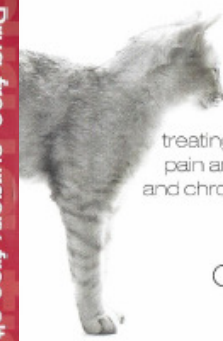

How it Works

The laser light is delivered through a noninvasive handpiece

to treat the affected area. Your pet may feel a gentle and soothing warmth. Most treatments take a matter of minutes.

Drug-free, surgery-free alternative to pain relief.

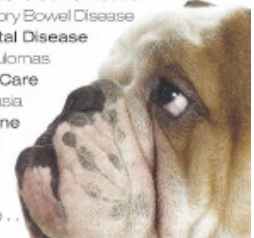

Laser Therapy has been scientifically proven to be successful in treating post-surgical pain and many acute and chronic conditions.

Acute Conditions

- Wounds
- Allergies
- Infections
- Cuts/Bites
- Inflammations
- Tooth Extraction Pain Relief
- Sprains, Strains & Fractures
- Post-Surgical Healing & Pain Relief

Chronic Conditions

- Degenerative Joint Disease
- Inflammatory Bowel Disease
- Periodontal Disease
- Lick Granulomas
- Geriatric Care
- Hip Dysplasia
- Feline Acne
- Tendonitis
- Arthritis
- Otitis
- And more...

Wellington Veterinary Clinic is excited to now offer the many benefits of laser therapy for our patients. This therapy is safe and backed by clinical studies both in veterinary and human medicine. Laser therapy reduces pain, accelerates the healing process, reduces inflammation, and reduces the need for prescription drugs.

Laser Therapy is very helpful in treating a wide variety of conditions from arthritis and other joint issues to skin complaints and infections. In addition, we recommend the application of Laser Therapy with all dentals, spays, neuters, and declaws to help reduce pain and speed healing.

Call or visit us to ask how this non-invasive, science-backed therapy can help your pet and complement your existing treatment programs. We are excited at the prospect of helping your pet with laser therapy.
